DETAILED ACTION

1. This Action is in regards to the Amendment and Response received on 20 October 2003.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 1-8** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. Regarding **claims 1-8**, the phrase "whether or not" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "whether or not"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

- b. Regarding **claims 1-3**, the recitation, "**while then** the instances are the same", is confusing in its present form. The Examiner has interpreted this limitation to mean, "when the instances are the same".

- c. Regarding **claims 2 and 3**, the recitation, "regarding either one" is ambiguous as to whether this includes only one or at least one of the newly requested operations. The Examiner will interpret this to mean "at least one of the newly requested operations.

- d. Regarding **claims 2 and 3**, recitation "the classification. There is insufficient antecedent basis for this limitation in the claim.

- e. Regarding **claim 5**, the recitation, "switching systems operation inherent to the system", is unclear and vague. What constituent's operations inherent to the system? The

Art Unit: 2143

Examiner will interpret this to mean execution of CMIP operations done based upon the format utilized by the system.

f. Regarding **claim 4**, the recitation, "in the form (matrix) of combinations, is unclear as to the meaning. The Examiner will interpret this limitation to mean in the form of a matrix. If Applicant is claiming the form to be in a matrix classification it is suggested that it be stated more clearly and direct.

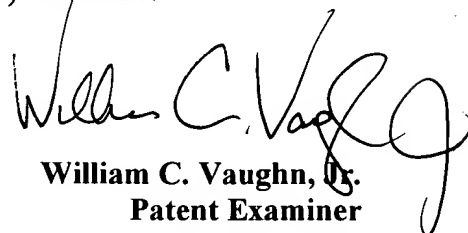

g. Regarding **claims 4 and 5**, the recitation, "the managed object instance. There is insufficient antecedent basis for this limitation.
